Installation instructions

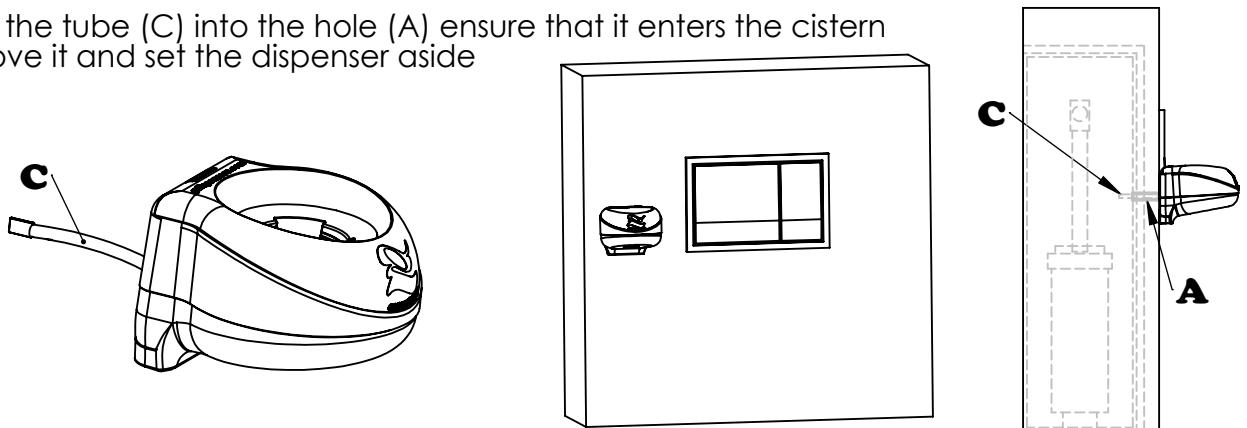

installation by a professional plumber

- 1** Remove the push button panel as well as the inner cover
Insure that there aren't any pipes or other devices under the drill spot (A)!
 Use a marker to draw a horizontal line (D), line it up with the bottom of the push button panel. Mark a spot to drill a hole (A) relative to the push button panel (see illustration)
Insure that the drill point is placed above the water level in the cistern !

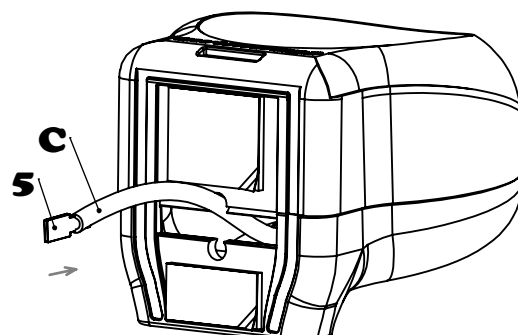

- 2** Drill a 7 millimeter hole (A) without vibration, Make sure that the hole is completely clean

- 3** Insert the tube (C) into the hole (A) ensure that it enters the cistern
 Remove it and set the dispenser aside

- 4** Carefully clean the area of oils and dirt and dry thoroughly

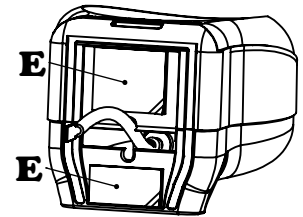

- 5** Verify that the tube (C) is in the upper position and that the Dropper (5) is attached
